

Unstressed and ergonomic seating when working with the Relax

Relax – compact, ergonomic and functional, the flexible stool for medical care

The Relax stool can be easily adjusted into the desired seat height from 55 cm to 70 cm, thus provides continuous comfort and maximum functionality. Due to its solid base frame the Relax is stable and can be moved safely and easily with the five smooth-running wheels.

The Relax is available in different colours to underline its modern design - always appropriate to your working environment.

For a flexible sitting position the seat of the Relax can be tilted. The lever for the height adjustment (left) and for tilting (right) is placed underneath the seat for easy and ergonomic handling.

Technical Data:

Height adjustment	55 – 70 cm
Wheel diameter	5 cm
